EXPERIENCE

Cybersecurity Mentor | SynthoQuest Pvt. Ltd., Guntur - Mar 2025 – Present

- Conduct cybersecurity training sessions on ethical hacking, VAPT, and security fundamentals.
- Guide students through hands-on exercises using tools such as Nmap, Burp Suite, Wireshark, and Metasploit.
- Conduct workshops and cybersecurity awareness sessions for students.
- Support students in cybersecurity projects, practical labs, and technical challenges.
- Prepare simple learning materials and practical exercises to help students understand cybersecurity concepts.

Cybersecurity Intern | SynthoQuest Pvt. Ltd., Guntur - Nov 2024 – Mar 2025

- Performed vulnerability assessments using Nmap, Nikto, and OpenVAS.
- Conducted basic web application security testing using Burp Suite and SQLMap.
- Documented security findings and prepared vulnerability assessment reports.
- Developed small Python scripts to automate basic reconnaissance tasks.
- Worked with the team on phishing and social engineering simulations.

PROJECTS

WAR-ROOM – Cybersecurity Event Platform | FastAPI, Python, SQLite, HTML, CSS, JavaScript
Built a platform to manage cybersecurity workshops and hackathons in one place. It handles student registration, challenges, toolkit sharing, answer submission, scoring, and leaderboards, making it easier to conduct and manage practical cybersecurity events.

CommandGPT – AI Cybersecurity Command Assistant | AI, Linux, Cybersecurity
Built an AI-based assistant that helps users understand and generate Linux and cybersecurity commands. The project focuses on making command-line tasks easier to learn and use during cybersecurity practice.

PhishSnare – Phishing URL Detection Tool | Python
Built a command-line tool to check URLs for common phishing indicators such as suspicious keywords, IP-based URLs, and URL patterns. It provides a simple way to identify potentially unsafe links.

StegCloak – Image Steganography Tool | Python
Built a tool to hide and extract messages inside image files using the LSB technique. Added password protection to make the hidden data more secure.

SynthoQuest Certificate Generator | Python, Flask
Built a web-based tool to generate certificates using predefined templates and student details. Automated certificate numbering and certificate generation to reduce the effort involved in creating certificates manually.

KeyVenom – Security Testing Automation Tool | Shell, Metasploit
Built a security testing tool that automates parts of the payload generation and testing process using Metasploit in controlled lab environments.

EDUCATION

Hindu College, Guntur | B.Sc. in Computer Science | 2022 – 2025
